

Spa and Bath Wall Paneling

Your Spa Dream, Our Design Challenge

The culture of creating a luxurious spa experience, whether in homes, hotels, private swimming pools or clubs, has become increasingly popular due to their evolving into spaces of relaxation and comfort as part of contemporary leisure life.

At CaesarStone, we see ourselves as a natural partner to this global trend and have taken it one step further with unique wall paneling, delivering a magical advantage that lies in the freedom of our design. Unlike ceramic tiles and other similar products, we offer our customers the ability to make their design dreams come true with any panel size and shape.

With CaesarStone's quartz surfaces, you can now customize your wall paneling exactly according to your needs and desires. All you have to do is dream.

*Inspiring the ultimate, luxury experience,
for home and public baths, showers and spas,
with customized wall paneling solutions.*

Design Benefits and Solutions

CaesarStone offers a range of wall paneling advantages and solutions that can be custom designed according to any specific needs.

For The Home CaesarStone's quartz surfaces can be implemented in kitchens, bathrooms, and other home spaces to offer a comprehensive home design solution that delivers an elegant, stylish look and feel.

Full Panel Walls CaesarStone wall panels are available in various tile sizes according to customer specification and also in large, full slabs (144x305 cm) in a wide range of colors and finishes. Full panel slabs on bathroom walls create a powerful, impressive effect offering a clean, unified appearance of one piece as opposed to the fragmented look created by tiles.

Wall Basin Integration Our product can be used for a variety of applications in the bathroom from floors to countertops to wall paneling and more. This ultimately enables seamless design uniformity of material and texture which can be further enhanced by our rich variety of colors and textures.

Rounded Corners At CaesarStone, we can round off the sharp corners of 90° angle perpendicular walls. The ability to round out vertical corners using our own materials, offers an inspired solution for designers to deliver a smooth, soft touch.

The Perfect Solution for Humid Environments

As the proud owners of a brand that is instantly associated with dependable and superior quality, we do our utmost to develop and improve our high standards of quality. For us, this means delivering our clients with practical products that are safe and durable.

Safe, Clean Surfaces CaesarStone quartz surfaces are designed to offer a practical, hygienic and environmental-friendly solution for moist and humid surroundings. Their nonporous nature makes them resistant to water and thus to mold, mildew and bacteria, making them ideal for use in humid environments, especially bathrooms, spas, wet saunas, Turkish bath houses etc.

Minimal Maintenance, Eco-Friendly CaesarStone's quartz surfaces never need sealing and require minimal maintenance to keep them looking like new. Their hard, non-penetrable surface makes cleaning simple and in most cases, soap and water or a mild detergent are all that are required to maintain its luster. Minimal maintenance translates to minimal eco-damage, an important factor in preserving the environment and in green building projects.

Long Life-Durability CaesarStone's wall surfaces are 13 mm (0.51 inches) thick, and can be mounted as full wall slabs. Unlike the installation of wall tiles, full CaesarStone slabs are installed with almost no spaces, requiring minimal use of bonding and sealing materials. This in turn simplifies the building process and minimizes the need to periodically replace worn materials.

No matter what your spa or bathroom demands, CaesarStone products enhance and inspire designers to create an atmosphere of relaxation and serenity.
